SUMMARY

Motivated and detail-oriented Full Stack Developer with strong expertise in **Java, Spring Boot, HTML, CSS, JavaScript, Bootstrap** and **MS SQL**. Experienced in developing scalable web applications, **RESTful APIs**, and Actively building real-world full-stack applications and exploring DevOps practices including **CI/CD, Docker**, and **AWS**, to strengthen end-to-end application delivery. Strong **problem-solving** and debugging skills, with a focus on clean Code, team collaboration, and continuous learning.

EDUCATION

Dr.APJ Abdul Kalam Technical University

2022 – 2026

B.Tech - Computer Science and Engineering - CGPA - 7.1

Kanpur, Uttar Pradesh

EXPERIENCE

Intern at BTPS Technologies [↗](#)

January 2025 - September 2025

Role - Full Stack Java Developer

Kanpur, Uttar Pradesh

- Designed and developed dynamic web applications using **Java, JSP, Servlets** and **web technologies** such as **HTML5, CSS3** and **JavaScript**.
- Created and consumed **RESTful APIs** using **Spring MVC** and **Spring Boot** enhancing application modularity and scalability by **40%**.
- Implemented data persistence using **JPA** and **Hibernate** in a **Spring Boot application**, designing **entity** relationships and optimizing **CRUD** operations. Improved query efficiency by **25 %** and reduced boilerplate database code by **40%** through JPA repositories.

PROJECTS

Job-Hook | [Full Stack Application \(Ongoing\)](#)

January 2026 – Present

- Developing a scalable full-stack application using **Java Spring Boot** and **React**.
- Designing and implementing **RESTful APIs** and integrating frontend with backend.
- Applying **Docker** and **CI/CD pipelines** to streamline deployment and improve scalability.

E-commerce [↗](#) | [website](#)

September 2025

- Developed a dynamic and responsive e-commerce website using **Java Spring Boot**, improving backend performance by **35%** through efficient **API design** and database optimization. Implemented **Spring Security** to achieve **100%** secure user **authentication** and role-based **authorization**, ensuring robust protection of sensitive user data. Utilized **MySQL** for efficient data storage and management, enhancing query performance by **30%** through indexed schema design. Designed an interactive, mobile-friendly frontend using **HTML, CSS, JavaScript**, and **Bootstrap 5**, achieving **98%** responsiveness across devices and improving user engagement by **40%**. Demonstrated end-to-end **full-stack development** skills — from secure backend integration to intuitive frontend UI — delivering a **production-ready e-commerce solution**.

TECHNICAL SKILLS

Backend Technologies: Java, Spring Boot, RESTful APIs, Spring Data JPA, Hibernate, JSP, Servlets.

Frontend Technologies: HTML5, CSS3, JavaScript, Bootstrap, React.

Databases: MS SQL Server, My SQL.

Version Control/Platform: Git, GitHub.

DevOps Deployment: Docker, CI/CD Basics, AWS (Basics).

CERTIFICATIONS

- Software Engineering Job Simulation - **Foradge**
- Java Developer Certification - **Byte code it solutions**
- Introduction to Java Spring framework 101 - **SimpliLearn**

DEVELOPER TOOLS

- VS Code
- IntelliJ IDEA
- Eclipse
- Apache NetBeans
- GitHub
- My SQL
